The application has been amended as follows:

Please change the Title to read:

Fuel cell system having switching fuel flow

### ***Allowable Subject Matter***

Claims 1 & 3-8 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art of record, Wariishi and Ibrahim, do not teach or reasonably suggest the claimed invention of a fuel cell system that has a flow amount controlling unit that controls flow amounts of the fuel gas passing through the first supply passage and the second supply passage, wherein fuel gas supplied via the first supply passage and fuel gas supplied

Art Unit: 1726

via the second supply passage meet each other in counter-directional flow within the anode to form an extreme downstream position of the fuel gas, and wherein the flow amount controlling unit executes a control for supplying fuel gas to the anode in simultaneous flow from both the first supply passage and the second supply passage and varies a ratio between the flow amounts passing through the first supply passage and the second supply passage over time when the exhaust passage is ~ closed to actively control the location of the extreme downstream position of the fuel gas within the anode and controls the flow amount such that an the extreme downstream position of the fuel gas coincides with a position at which the exhaust passage is connected to the second supply passage when the opening and closing unit is open.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
